

The worlds best industrial seatbelt just got *a lot ...* **BETTER**

The seatbelt of choice for safety conscious industrial businesses like: contracting, material handling, airports and alike, has now been improved even more.

Renowned for 3 unique benefits:

-ease of use, -quick to fit, & -high visibility, it has now been upgraded to include an improved self centering spring-loaded mount.* This means that it's always in the right place to put on. At the same time installation is a lot easier and there is also a lot less strain on the seat base, to which **Springbelts** are often mounted.
